

SUMMER

True Summer

Cool, light and clear. Icy rather than dark: the clarity comes from the colours being clean, not from them being deep.

Also called Cool Summer.

Your white and your dark

Best white
Icy White

Best white for you. Cold and clean.

Best dark
Cool Graphite

Use instead of black – black is a shade too hard for a light season.

Colours to keep away from your face

Harder next to your face – warm, golden or earthy against cool light colouring. Lower down, or as a small accent, they can still work.

Jet Black

Cuts a hard line across a light face. Wear Cool Graphite.

Burnt Orange

The most warming colour there is, and you cannot carry it.

Avocado Green

Yellow-green turns your skin sallow.

Cream Beige

Cream is your enemy where Icy White is your friend.

Rust Brick

Earth red. Your red is Raspberry Rose.

Camel Tan

Golden neutral. Wear Cool Dove Grey instead.

Metals and stones

Metals: Silver, White gold

Yellow gold reads brassy next to blue-based skin. Rose gold is the one warm metal that still works.

Stones: Sapphire, Emerald, Ruby, Clear quartz

Cloudy or heavily included stones look dull beside clear colouring – the stone should have some light in it.
